### Preventive measures

It is important not to be infected with the corona virus.  
Read the next page for preventive measures.

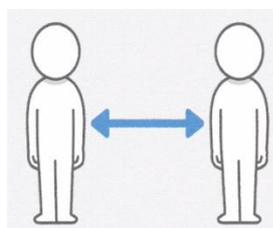

# Points to prevent the spreading of the new corona virus infections.

## 3C' prevention

Closed ( closed space with poor ventilation • closed gathering (close gathering with large number of people) • closed connected (conversations and occurrences occur within reach of each other) at the same time, there is a high risk of spreading the infection.

Ventilate frequently and keep a distance of 2 meters or more from each other.

## Wear a clean mask.

To prevent the spread of the virus, everyone wears a mask.

Even inside the house wear a mask.

Also, replace it daily and use a clean one.

## Wash your hands frequently, gargle every time.

Wash your hands frequently with soap and disinfect with alcohol.

## Avoid sharing towels.

Do not reuse towels.

Use something different.

## Keep meals quietly. Use small dishes.

Avoid conversation during meals as much as possible.

Avoid sharing tableware and use pieces of tableware.
